DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Libman disclose providing over network a user age identifier which is suitable to define user's age wherein step of providing user's age identifier includes transmitting to at least one of site,service provider and user age information related to age identifier information related to age identifier in (col.8,lines 19-47). Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2135

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Libman et al(US 6,608,814).

Claims 4-7: Libman does not specifically disclose receiving from user age identifier in a network navigation program used by user to connect to data communication network. Official notice is taken that network navigation program is well known in the art. One of ordinary skill in the art would have been motivated to employ network navigation program such as netscape navigator or Microsoft Internet Explorer in order to in order to connect to different web sites for data acquisition. Libman disclose age identifier reveals user is a minor in (col.8,lines 42-47).

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 recites the limitation "said site". There is insufficient antecedent basis for this limitation in the claim.
